

INAsup The French National Audiovisual Institute School

INAsup, the school of the National Audiovisual Institute, is part of the French Ministry of Culture network of Higher Education institutions. It was created in 2007 to train students in the fields of Film, TV and Digital Media Production, and Moving Image Collections Management.

INAsup is part of the Higher Education and Continuous Training Department of INA. Being part of INA enables the school to share a professional and cultural network, which facilitates the insertion of graduates in the industry.

INAsup is a full member of CILECT, the International Association of Film and Television Schools.

INA delivers two Masters Degrees: Film, TV and Digital Media Production Master and Audiovisual Heritage Management Master. Both are certified by the French Ministry of Culture as well as by the French Ministry of Higher Education.

Audiovisual Heritage Management Master

Drawing on INA's core activity and know-how, this master aims at providing a new academic program, combining culture and technique.

Audiovisual archives managers are facing new challenges at present, such as carrying out digital migration from analogical formats, set out and manage new offers for audiovisual documents, both commercial and cultural, run vast amounts of data and metadata. INAsup Audiovisual Heritage Management course intends to give an answer to these main challenges.

Graduates acquire a set of hybrid skills that span organizational and management skills, technological literacy and intellectual propriety management and protection, therefore contributing to shape a new generation of audiovisual archivists.

Entry requirements

INAsup enrolls students coming from different backgrounds and nationalities who have completed undergraduate studies.

15 students are selected each year. Applicants must have at least a Bachelor's degree level or diploma and be no more than 27 years old in the year they register. They are selected through an online application followed by an interview.

French language level required to apply is B1.

Course and diploma

INAsup provides a two-year course organized in three semesters of coursework and a semester working as an intern within a company. The program combines hands-on training and theoretical studies. The teaching involves professional actors together with university professors.

The programme is based on:

- A multidisciplinary education foundation intended to provide an audiovisual, digital and managerial culture (law, economics, audiovisual techniques, history and management) ;
- Fundamental and professional education linked to conservation, preservation, valorization, and assessment of sounds and images collections.

The teaching is completed by conferences, master classes, visits, study trips and presence during professional events such as film festivals.

According to the European Credit Transfer System (ECTS*), INA master provides 120 ECTS*.

* ECTS is widely used throughout higher education institutions in Europe; it has been conceived in order to facilitate students mobility within Europe and the comparison of study programs and courses.

Jobs prospects

INA Audiovisual Heritage Management Master graduates are employed in

- moving image and sound curatorship;
- audiovisual collections and media assets management;
- on-line and off-line publishing;
- organization of events involving footage or heritage collections;
- audiovisual material archiving (preservation, indexation, valorization, expert assessment, digitization...).

Research at INAsup

INAsup educational project is combined with research activities in order to provide the education with an analytical and prospective dimension. This dimension is favoured by the proximity of the research activities taking place at INA in the field of human and social sciences through the activities of Inathèque (INA audiovisual collections research centre), being the focal point for thinking on the image, media and communications (conferences, seminars and publications).

The school calls on experienced teachers-researchers for the teaching units who associate the assimilation of a professional practice and scientific research methods (media studies, media and digital economics). Experimentation is intrinsic to certain educational contents such as workshops aiming to develop new forms of writing and formats for digital media as well as teaching devoted to the exploration of new modes of production and the digital distribution of audiovisual content.

INAsup assets

- Students with diverse backgrounds ;
- Career opportunities for graduates in all fields of the media and cultural industries, in France and abroad ;
- A balance between professional practice and the acquisition of solid intellectual basis ;
- Networking opportunities with industry leaders and participation in professional events.

Practical informations

Courses start in October, end in June.
