Bibliography	
Katie Trainor	Page 11
Roundtable Excerpts	
Janice Simpson	Page 17

Thanks to the Library of Congress's National Film Preservation Board,
Sony Pictures Entertainment, and the National Endowment for the Arts.

This compilation, prepared for the 2001 Small Gauge Film Symposium, gathers some initial information prepared by the Task Force to share with AMIA. The documents are works in progress, and cry out for your additions.

We invite you to participate in all the Small Gauge presentations throughout the Symposium, to think about the cultural and artistic import of small gauge and amateur film—and if possible to join us on Saturday at 4 p.m. for “A Brainstorming Session on Future Umbrella Projects for Amateur and Small Gauge Film.” Onward!

Task Force Members

Chair

Small Gauge Film Equipment Providers

SPLICES AND LEADER

Tech Note: Please use white leader from Neumade or Kodak. The plastic (often colored) leader used by some processing labs shrinks faster than the acetate film itself so replace it on old reels for long storage.

NEUMADE CORP.

Acetate leader, splices, reels etc. at quite reasonable prices in 8mm and Super 8 film as well as the larger gauges. Neumade Corp, 30-40 Pecks Lane, Newtown, CT 06470 203 270-1100 or Fax 203 270-7778. www.neumade.com

FPC and EASTMAN KODAK

Leader, Presstape splices and other necessary supplies can be ordered from the Kodak Professional Motion Imaging order line people in NYC: 800 621-3456 or Kodak FPC in Hollywood 800 814-3456

At FPC Christel Pareigis (christel@kodak.com) will send you a document with the conversion from Kodak catalog number to FPC item number. She is attending our AMIA 2001 conference so please find her in the vendor area.

FPC Hollywood items:

16mm white movie leader, single perf
16mm white movie leader, double perf
Super 8 white movie leader, 1000 foot box
16mm splicing tape perfed

Kodak Motion Picture items:

16mm presstapes Kodak CAT# 154-9922, box w/20
Super 8mm presstapes Kodak CAT# 147-5771, card w/ 20 packs
Regular 8mm white movie leader, 50 feet Kodak CAT# 163-5002
Regular 8mm presstapes Kodak CAT# 154-9914, card w/20 packs.

George Eastman House	West Virginia State Archive
Human Studies Film Archives	Wolfson Center
Imperial War Museum	WPA Film Library
Mississippi Dept. of Archives & History	
National Archives of Canada	<i>* see note at bottom of page</i>

Thirty-two institutions responded to the Small Gauge Film Survey. Twenty-eight archives supplied the percentage of small gauge film in their collection; twenty-six institutions supplied a footage count; and twenty-five provided a reel count in the 6 gauges surveyed: 8mm, S-8mm, 9.5mm, 17.5mm, 22mm, and 28mm.

Small gauge film represented from over 56% to less than 1% of the moving image holdings of 28 archives. For slightly more than 33%, small gauge made up 1% or less of their collections.

The footage count ranged from 1000 ft. to over 800,000 ft. of film. Twelve institutions held 1000 ft. to 10,000 ft. of small gauge film (SG); five held 50,000 ft. to 100,000 ft. of SG; and seven repositories held over 100,000 ft. of SG.

Of the twenty-five archives that gave a reel count, the least common gauge was 22mm, held by three institutions; 8mm was the most common, held by twenty-three institutions; followed by Super-8, held by nineteen archives; 9.5mm carried by sixteen archives; 28mm carried by nine archives; and, 17.5mm held by six archives.

Karen Glynn, Duke University, Special Collections
karen_m_glynn@valkyrie.oit.duke.edu

* Not yet included in survey, pending response from institutions: The National Film Preservation Foundation gave grants for preservation of small gauge film to the Japanese American National Museum, National Center for Jewish Film, Pacific Film Archive, State Agricultural Heritage Museum at South Dakota State University, and National Baseball Hall of Fame and Museum.

Small Gauge & Amateur Bibliography

This is an initial bibliography for those interested in learning more about small gauge and amateur film. These categories are not definitive: History and Criticism, Filmmaking Manuals/Guides, Periodicals, Technology, Miscellaneous. A listing may well fit into more than one category. A majority of these listings are still available at libraries and archives. This bibliography is an ongoing project; additions are welcome. Please send suggestions to Katie Trainor, ktrainor@geh.org.

EXCERPTS Roundtable June 17-18, 2000

Sony Pictures Studio, Culver City, CA

Minutes prepared by Janice Simpson, AMLA Administrative Coordinator

Attendees:

Steve Anker, Grover Crisp, Karen Glynn, Lynn Kirste, Michelle Kribs, Sam Kula, Ross Lipman, Patrick Loughney, Anne Morra, Mona Nagai, Bill O'Farrell, Eddie Richmond, Karan Sheldon, Janice Simpson, Melinda Stone, Dwight Swanson, Linda Tadic, Toni Treadway, Ken Weissman

Archivists, curators and technicians (brought together by the Association of Moving Image Archivists Small Gauge Film Preservation Task Force) were invited to discuss selection, methodology and preservation issues involved in archiving amateur/small gauge film. The meeting was funded by the Library of Congress and National Film Preservation Board, whose mandate includes the study and investigation of film preservation activities. The purpose of the meeting was to determine collecting priorities, identify the small gauge film in existence, decide what is most important for institutions to collect, and determine ways and means to ensure its preservation.

AMIA President Sam Kula began by identifying two objectives:

1. to help the Library of Congress with the study and investigation of film preservation and assist the Library in identifying suitable candidates for the National Film Registry, and,
2. to develop a document to assist AMIA with planning for a small gauge symposium in 2001 and other preservation strategies.

SELECTION (SAT. 9:15AM-10:00AM)

Kula identified a subset of issues falling into one of two areas of concern (technical and selection):

- restoration (the degree to which we restore)
- access issues
- how to make decisions regarding the demands of various formats
- funding
- adequate storage facilities

Many institutions are governed by institutional acquisition policies that define their parameters for acquisition. In terms of selection however, efforts are constantly being made to develop a commonly shared standard set of principles - selection criteria. How is small gauge film distinct from other media and are there any criteria specific to these formats? Treadway emphasized the importance of determining what makes small gauge different. Loughney suggested we begin by examining the Library of Congress National Film Registry appraisal criteria: historical importance; cultural significance; aesthetic qualities.

Sheldon added the significance of technological landmarks, that is, what small gauge film picture and sound the technologies allowed/enabled people to do. Stone mentioned uniqueness and those images that are under-represented, highlighting the significance of the record of everyday life (i.e. the ordinary). The group identified barriers to small gauge preservation:

- cataloging staff not familiar with rules for describing small gauge
- there is so much it is an overwhelming curatorial task
- access: how is it seen
- new message for funders needed; little funder recognition
- marginalization inside institutions
- 'home movies' is pejorative term
- failure of organizations to collect
- copyright/rights problems and other biases
- who will copy it (available labs?) no laboratory support
- no generally understood selection criteria

WORKING GROUPS (SAT. 2:00PM - 4:00PM)

GROUP 1: APPRAISAL AND SELECTION (Participants: Kula, Sheldon, Anker, Loughney, Morra, Stone)

This group was tasked with proposing a means for identifying representative amateur and small gauge film with cultural and historical significance for nomination to the National Film Registry. In order to assist with identification the group designed a list of categories:

- amateur cine clubs
- diversity of American life
- scenes of daily life
- celebrations/holidays/rituals
- political and labor film
- milestones in development of small gauge technology
- art/avant-garde/experimental works
- nationally significant persons/places/things

The group expressed the opinion that throughout these categories, which are just a beginning, there should be care to ensure the aesthetic value of the material as appropriate, and to pay special attention to seeking out 'quiet voices', including films by and about underrepresented communities, including the experience of women and children.

GROUP 2: LONG RANGE ISSUES FOR SMALL GAUGE FILM

(Participants: Tadic, Richmond, Glynn, Kribs, Swanson, Simpson)

This group was tasked with identifying issues requiring further study and determining how to best study and to address these issues and put them in front of AMIA membership and others. Long term objectives of various stakeholders (major archives, regional archives, private holders, service providers). Best use of the 2001 Symposium. Possible funders for planning, funders for interim objectives.

The group began by outlining a three-year plan called the 'Small Gauge Initiative' that might be led by AMIA. The 4 components of the plan include:

1. Promote and Encourage Funding

The Task Force should identify (and communicate with) funders at the national and international level and work with the the NFPPF. Work with archives in regions to help provide them with resources and the support they need to obtain funding (e.g. prepare a Small Gauge Initiative statement regarding the importance of small gauge. etc.) To encourage new funding programs for small gauge and to encourage the expansion of existing funding programs to include small gauge.

2. Promote, Encourage and Facilitate the Collection/Preservation/Access of Small Gauge Film

- a) within AMIA (2000 conference, newsletter: - newsletter insert, journal articles, special journal issue, website)
- b) outside AMIA (conferences, newsletter, listserves, educational institutions).

3. Coordinate and Assist the Creation and Collection of Information about Small Gauge Film (bibliographies, list of technical facilities/equipment vendors/ supply vendors, small gauge events).

4. **Build Public Awareness** (exhibitions etc.) Examples might include: encouraging the National Film Registry Tour to include small gauge events, in their touring program; cooperate with other international/national organizations and conferences.

The group recommended that the initiative be led by AMIA through a Task Force in consultation with all other AMIA committees and interest groups. The group made specific recommendations for incorporating small gauge concerns into the 2001 AMIA conference.

GROUP 3. TECHNICAL GROUP (Participants: Treadway, Crisp, O'Farrell, Lipman, Nagai, Weissman)

This group met to examine specific problems of preservation of small gauge film, discuss lab tests needed, and begin to define discuss the technical criteria for preservation. Possible areas of interest and samples for The Reel Thing 2000 and 2001. The group recommended that the Task Force:

1. develop a list of labs that handle SG formats
2. examine the issue of copying SG to 35mm, 16mm, video
3. define a preservation path as well as a strategy for:
 - ensuring proper storage for preservation of original materials
 - providing access to reference copies
 - rationalizing prioritized selection for copying

The group identified the problems presented by small gauge not being dealt with and asked how we might change the dynamic to ensure it is addressed? The desired result would:

1. convince the commercial labs that if they make an in investment they will receive a return on their investment
2. obtain public sector support for small archives
3. collect search for equipment from of old defunct facilities
4. storage - strengthen storage at a regional and national level efforts of archives
5. increase and improve education about storage
6. promote aggressive collection by archives to ensure the material exists as conservation strategies improve something to preserve
7. produce FAQ sheets for AMIA web site
8. select targeted film for film copying.
