

Welcome to DAS Portland!

AMIA's Digital Asset Symposium (DAS) brings together speakers and case studies from a broad range of disciplines at the cross-section of theory and practice. Constantly evolving technology creates new opportunities as well as new challenges in the use and management of content.

These challenges and opportunities are not unique to one field or a single organization. Sharing with colleagues from a wide range of organizations offers the possibility to generate and gain new insights. DAS is the place where these conversations happen, and we are glad you are here to join in the discussion!

Enjoy the day.
