

Over the past few years, AMIA has moved to implement a sliding scale for event and webinar fees. In January, AMIA will implement a new sliding scale for individual membership fees. It has been more than ten years since membership fees have been reviewed, and we have made an effort to add new levels and keep the base low.

The new fees will use the same sliding scale as our events with senior, middle, and new professional levels. We are adding a bridge rate for members who are between jobs, as well as a rate for those who are retired but still active within the community. The GDP rate for international members and the student member rates will stay the same.

We know that salaries in our field vary a lot, even among those at the same professional level. For the recommended professional levels choose the membership fee that best reflects your own ability to pay, regardless of what professional level that reflects.

If you want to renew your membership before the new fees are implemented, please be sure to renew before January 25, 2022. You can renew your membership online and we'll extend your membership for one year from your current expiration date.

Student Member(1)	\$65
GDP International(2)	\$65
Bridge Rate(3)	\$65
Retired Professional	\$65
New Professional	\$125
Mid-Level Professional	\$155
Senior-Level Professional	\$185
Supporter Professional	\$250

*(1) Student members are asked to provide proof of student status.*

*(2) Individual Member (GDP Per Capita Rate) for international members, is for members living in countries whose GDP per capita rate is less than 60% of the US GDP. [For example, the 2019 US GDP per capita calculated by the UN was 65,134 – for those coming from countries with a GDP per capita less than 39,080 the discounted rate applies.]*

*(3) The Bridge Rate is available to renewing current members who are currently un- or under-employed and may be exercised in two, non-consecutive years.*
